

APEX FLEET CONSULTING

Independent Fleet Maintenance Consulting for Commercial Fleets

info@apexfleetconsulting.com 701-997-2739 www.apexfleetconsulting.com

Operators, not advisors. We work with commercial fleets of all sizes, delivering operational playbooks — not strategy decks — with any conflicts disclosed in writing.

\$50K–\$150K

Recoverable maintenance spend typically identified per audit

20–35%

Lower per-vehicle maintenance cost within year one

90 Days

Typical payback on engagement fee via vendor savings

\$150K–\$400K

Typical annual savings on a \$25K engagement

WHAT WE DO

Fleet Maintenance Audit

Quantifies spend drivers — PM compliance, downtime patterns, vendor pricing — and surfaces recoverable dollars in 2–3 weeks.

Vendor Network Optimization

Consolidates vendors, negotiates pricing, and builds a preferred network with consistent quality and cost control.

Fleet Operations Assessment

Evaluates dispatch efficiency, coverage modeling, and workforce utilization, with a prioritized improvement roadmap.

Mobile Maintenance Program Design

Builds the mobile technician operation: coverage plans, dispatch workflows, truck setup, and an executable playbook.

Fleet Technology Implementation

Guides the full technology lifecycle — system assessment, vendor selection, implementation, and team adoption.

HOW IT WORKS

1 ASSESS

Fleet Maintenance Audit quantifies where spend and downtime are actually coming from.

2 OPTIMIZE

Vendor, mobile-program, and technology work close the gaps the audit surfaces.

3 SCALE

Playbooks and benchmarks hand off to your team to run and sustain.

WHO THIS IS FOR

Fleet managers, directors of maintenance, and VPs of operations running **commercial fleets of any size** across logistics & delivery, construction & transport, HVAC/plumbing/electrical, and utility/energy fleets — facing high maintenance costs, unpredictable downtime, low PM compliance, or vendor pricing with no benchmark.
